In this article, a BMW E90 will be used. Other BMW models are similar and the diagnosis can be used with slight variations. At any point in this procedure that you find an incorrect state or faulty component, repair the item, clear adaptations and recheck system for fault codes. The following BMW models are often affected by these issues:

BMW VANOS System Fault Testing and Diagnosing

If your BMW ABS, brake, DSC, DTC, or ASC lights come on, along with a message on the iDrive screen reminding you to get your BMW serviced, your BMW ABS wheel speed sensor may need to be replaced. Usually, the three lights ABS, traction, and brake light come on as soon as you start to drive. In some cases, the three lights may come on after a few minutes of highway driving.
