Optimizing SQL Server Performance with Microsoft Dynamics ...

(In Dynamics NAV these are referred to as ' Flowfields '). A poor performing calculated field can dramatically affect the performance of a page, especially on a list where the field is being calculated for each record in the list and mainly for records you are not interested in, if you are paging through looking for a single record. What to check

The basics. A NAV " BLOB " data-type is actually the " image " data-type in SQL Server (SQL also features other LOB types as " text " or " ntext " but they aren't relevant for NAV). [Out of the box, NAV flags a "BLOB" field with the property " Compressed " = TRUE. If this is enabled, NAV uses a compression algorithm to save the data more compact. Have in mind that SQL Server does not recognize this "compression", so if you're using BLOB to transfer binary data from
